

# Fabric Softener

## Technical Bulletin

**Dominant**<sup>®</sup>

### Product Description

Fabric Softener softens fabrics, reduces static electricity and drying time and leaves a bacteriostatic finish on linen.

Fabric Softener is a concentrated product so only a small amount is required to leave clothes feeling soft and comfortable.

It is a multi functional product. As well as softening fabrics, it reduces static electricity, makes ironing easier, leaves a bacteriostatic finish on linen and has a fresh waterlily fragrance to deodorise.

### Applications

#### How To Use

Add Fabric Softener to the final rinse water.

For handwashing add ½-1 tablespoons (10-20ml).

In a domestic washing machine use 1-2 tablespoons (20-40ml).

Commercial machines use 25-40ml/25kg load or 60-75ml/25kg load if roller ironers are being used.

Do not pour undiluted Fabric Softener directly onto clothes.

If synthetic fibres or blends are causing static shock when pulling out of dryers, increase level of Fabric Softener.

If water is discoloured, for example when mains are being cleaned, discontinue use of Fabric Softener until water clears. Fabric softeners can pull discolouration out of water and on to fabrics.

### Technical Data

Fabric Softener contains a cationic long chain softener, plus dispersing agents to give even softening and a quaternary ammonium compound.

It has a pH of 5.5 in the neat form.

### Pack Sizes

(2x5L Bottle)	C11940
15L Drum	C13722
5L Drum	86080
1L bottle	90150

### Dominant Colour Code

### Hazard Information & Safety

Classified as Hazardous according to the criteria of the SafeWork Australia, utilising GHS. A Safety Data Sheet for this product is available at [www.dominant.com.au/sds](http://www.dominant.com.au/sds)

#### Warning

Causes skin irritation.  
Causes serious eye irritation.

Poisons Schedule:  
Dangerous Goods: Not Classified

### Recommended PPE

Wear: **GLOVES, SAFETY GLASSES** when handling.
