

Premium Hand Cleaner

Technical Bulletin

Product Description

Premium Handcleaner contains an iso-paraffin solvent to dissolve grease and oil. This is a highly refined solvent so doesn't have the odour or toxicity of kerosene used in cheaper handcleaners. It also contains D-Limonene a solvent derived from the peel of oranges to assist in cleaning and give the product a fresh orange odour.

Combining the solvents with detergents and pumice to scrub the skin gives highly effective removal of heavy oil and grease deposits from the hands.

Premium Handcleaner contains both glycerine and lanolin to moisturise and protect the skin.

Premium Handcleaner is available in cartons containing 2 x 5 litres. The bottles can be fitted with a 30ml Abrasive Pump to allow easy dispensing of the product.

It is also available in Capacity Plus cartons. These 3.5 litre cartons fit into a dispensing bracket and each carton has its own dispensing tube negating problems with pumps not working due to the abrasive nature of the product.

Applications

How To Use

Fit 30ml pump into 5 litre bottles or pull out the dispensing tube from the Capacity Plus carton and fit into the dispensing bracket.

Dispense onto the hands and work into the soiling thoroughly before rinsing off in water.

Technical Data

Premium Handcleaner is based on a blend of non-ionic detergents, solvents and pumice for effective removal of greasy soils.

It has a pH of 6.5 to maintain the natural pH balance of the skin.

The detergents in Premium Hand cleaner are all classified as biodegradable.

Pack Sizes

(2x3.5L Pod) Carton	C15521
(2x5L Bottle) Carton	C21326
